

## Oblig 2 - INFO212

### Task a)

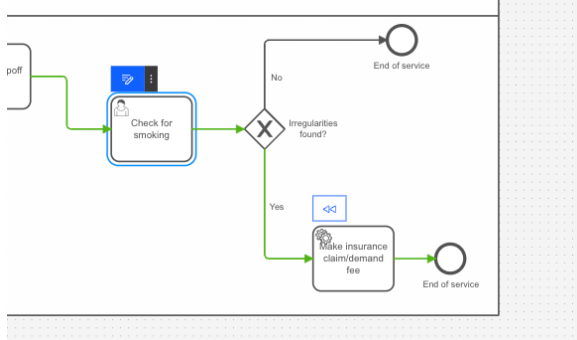

### Task b)

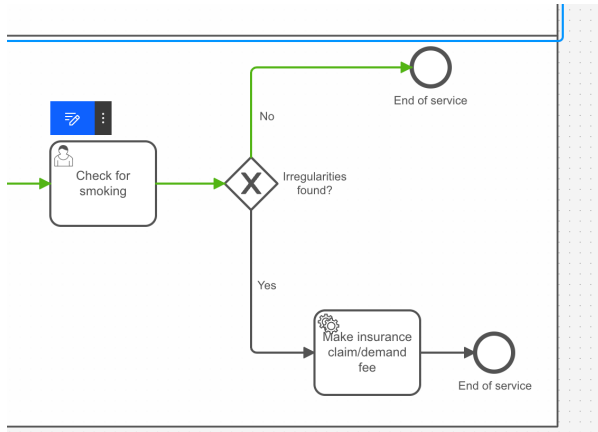

**Short description:** We made a BPMN diagram with several user tasks and some service tasks. We use two exclusive gateways with a Yes or No value for both. The pictures below show that they will either go to Yes or to No in both instances.

The forms for checking smoking:

The first screenshot shows the 'Task Form' with the 'Smoking detected?' dropdown menu set to 'Yes'. The second screenshot shows the same 'Task Form' with the 'Smoking detected?' dropdown menu set to 'No'. Both forms include a 'Reset' button, a 'Close' button, and a 'Complete' button. A blue banner at the top of each form reads: 'Variables prefilled from a previous session. Save as example data for collaborative reuse. Learn more'.

The exclusive gateways for checking smoking:

The forms for driver licence:

Task Form

Variables prefilled from a previous session

Save as example data for collaborative reuse

[Learn more](#)

Valid driver licence?

Checking drivers license

No

Reset

Close

Complete
