

Most Frequent Activity:

The most frequent activity was “Analyze Request for Quotation”.

Least frequent activity:

The least frequent activity was “Amend Purchase Requisition”.

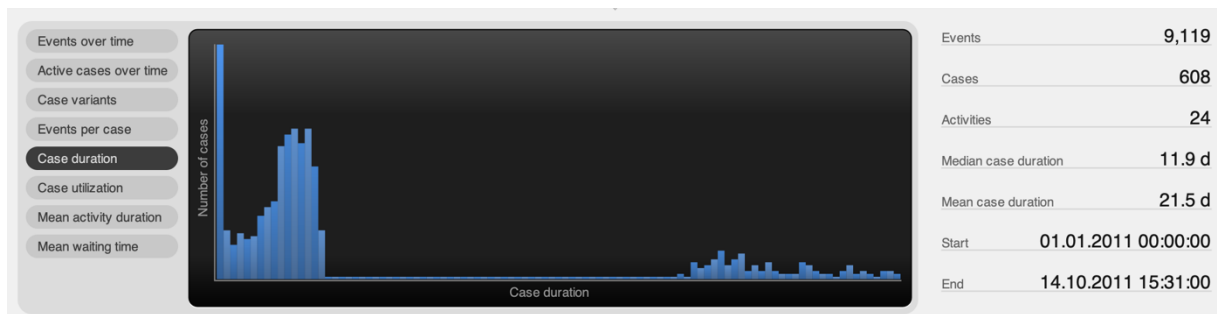

The longest case in terms of duration and number of activities:

Cases (608) Variants (98)						
Case ID	Events	Variant	Started	Finished	Duration	
655	26	Variant 14	04.04.2011 21:49:00	22.07.2011 05:21:00	108 days, 7 hours	

Case ID	Events	Variant	Started	Finished	Duration	
361	44	Variant 93	20.02.2011 20:38:00	12.05.2011 23:42:00	81 days, 2 hours	

Here are those cases.

Visualization of case duration based on number of cases:

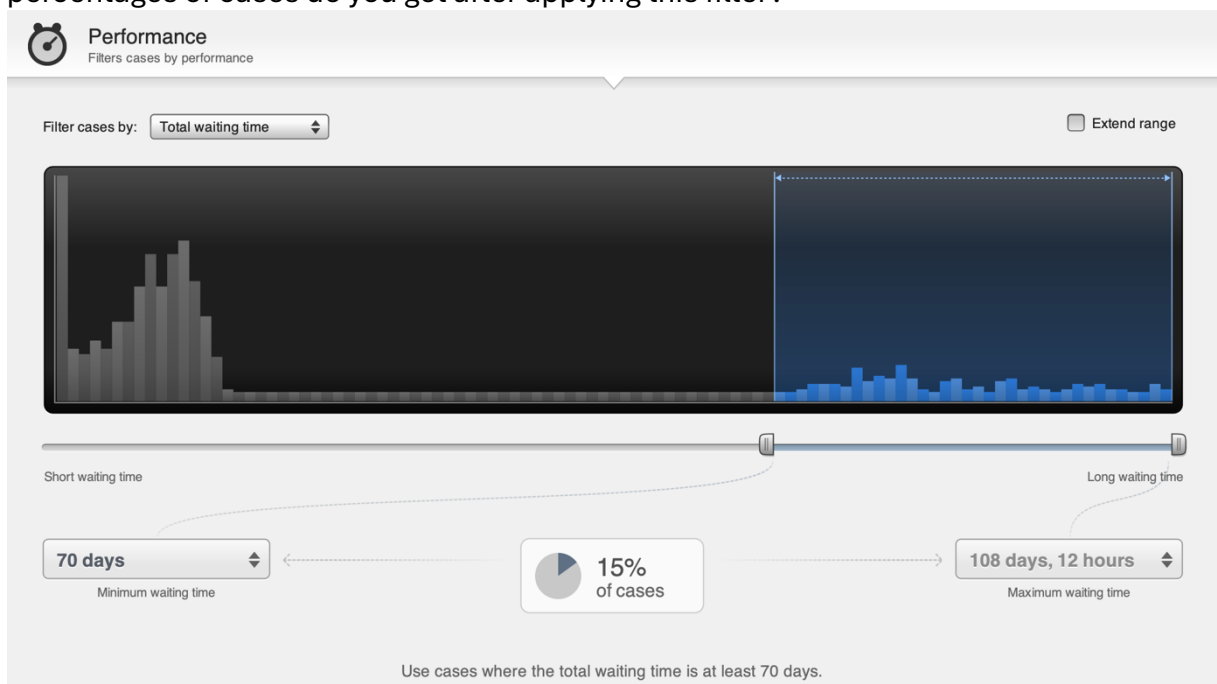

Here is the visualization.

Which activity has the maximum number of repetitions in the whole process? What is the total duration of that activity? How do you infer this information from fluxicon disco?

Activity	Frequency	Relative frequency	Median duration	Mean duration	Duration range
Analyze Request for Quotation	1,107	12.14 %	23 mins	23 mins, 2 secs	50 mins

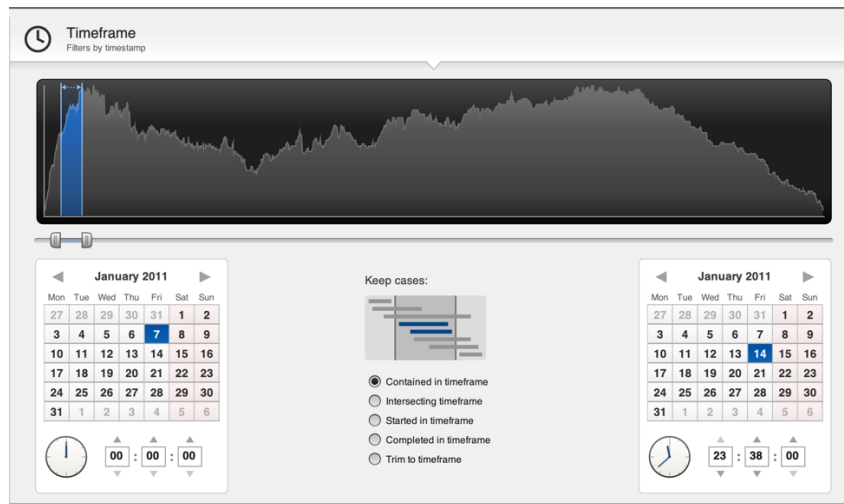

That was “Analyze Request for Quotation”.

Filter cases by ‘Total waiting time’. Setup 70 days as minimum waiting time. How many percentages of cases do you get after applying this filter?

Here is the filter and, the percentages of cases we got by applying that filter was 15 % of the cases.

Filter cases by 'Timeframe'. What is the total number of cases that were handled from January 7th to 14th? Find out the case variant that has the maximum number of cases. How many cases are there in that variant? Use that variant to filter the cases and show the process model after that filter.

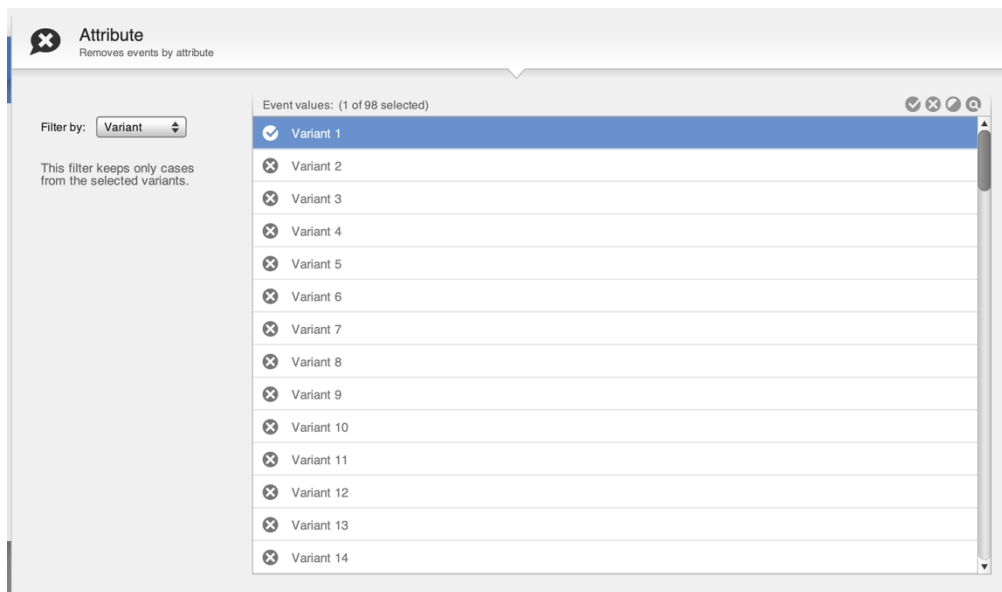

Here is the filter above this line.

Events	34
Cases	9
Activities	6
Median case duration	25.7 hrs
Mean case duration	29.7 hrs
Start	08.01.2011 02:37:00
End	14.01.2011 20:32:00

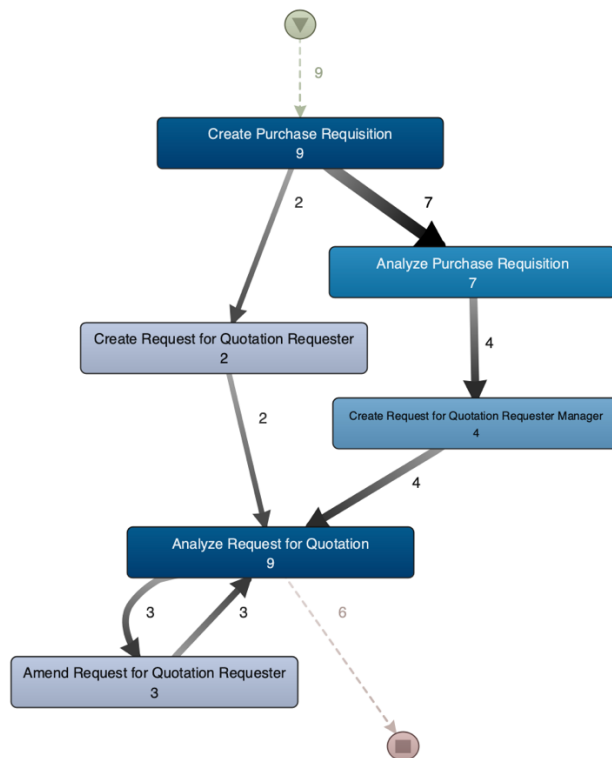

The total number of cases that were handled were 9.

Cases (9) Variants (5)					
Variant	Cases	Events	Median duration	Mean duration	
Variant 1	3	2	18 hours, 57 mins	19 hours, 35 mins	
Variant 2	3	4	1 day, 4 hours	1 day, 6 hours	
Variant 3	1	3	1 day, 8 hours	1 day, 8 hours	
Variant 4	1	5	21 hours, 22 mins	21 hours, 22 mins	
Variant 5	1	8	2 days, 13 hours	2 days, 13 hours	

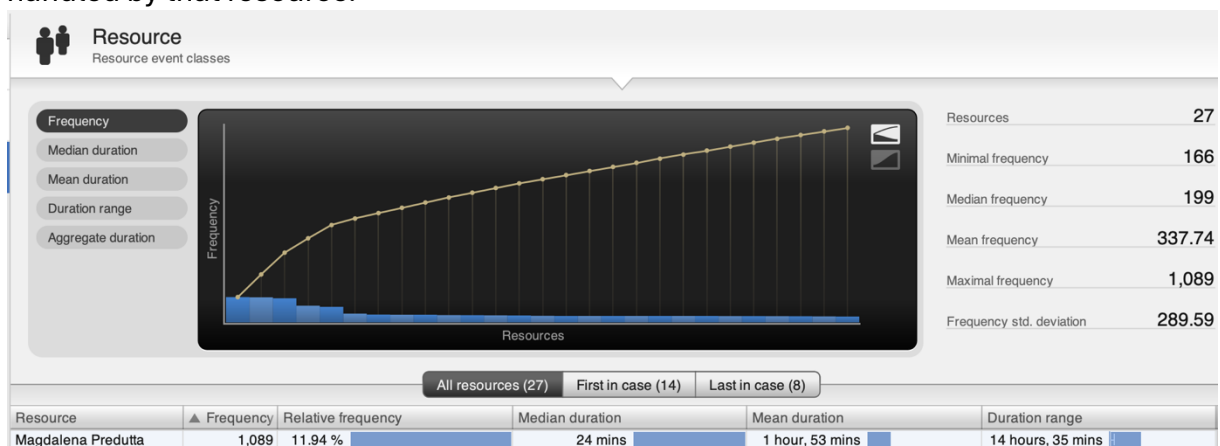

The case variant with the most cases was variant 1.

Here we filter by variant 1 above. And we got the process model below from that filter.

Who among the resources has the highest frequency? Filter only the cases those were handled by that resource.

The resource with the highest frequency was “Magdalena Predutta”
